

INDUSTRY INNOVATIONS

We are currently in our planning stages for topics for upcoming *Industry Innovations* publications and thought: What better a way to choose than to ask our Industry Partners/Suppliers what they would like to see.

You and your company have the opportunity to provide us with a topic which we may use for a future issue. This is the perfect opportunity to provide suggestions for topics for which your group would consider submitting a white paper and/or ad. Please provide me with a title/topic as well as a quick synopsis.

If you have any questions, please let me know.
