

**1 CE CREDIT**

# Metrex Presents: The FYI on IFUs

## Course Description

This professional education course will discuss the challenges faced by healthcare facilities in achieving cleaning and disinfection compliance for medical devices in the environment of care requiring low and intermediate-level disinfection.

We will provide a basic understanding of the following:

- The history of regulatory requirements.
- Discuss current issues associated with IFU compliance.
- Provide strategies to enable facilities to achieve the intended goals of these regulatory requirements.
- Promote patient safety in their own facilities.
