Today, @IntFedAgeing and partners are pleased to release the consensus statement resulting from the “Adult #Influenza #Vaccination: Calling #Canadian Patient Organizations to Action” meeting held in Toronto, June 2019. #Vaccines4Life [https://bit.ly/2m0cf4x](https://bit.ly/2m0cf4x) @IntFedAgeing @Vaccines4Life

#Canadians are faced with complex and mixed messages regarding #influenza #vaccination that often leads to the spread of #misinformation. Read the consensus statement to learn more: [https://bit.ly/2m0cf4x](https://bit.ly/2m0cf4x) @IntFedAgeing @Vaccines4Life

Sub-populations including the #LGBTQ community and #Indigenous peoples often face systemic #barriers and implicit biases within and outside of the #healthcare system that can impact their healthcare use. [https://bit.ly/2m0cf4x](https://bit.ly/2m0cf4x) #HealthEquity @IntFedAgeing @Vaccines4Life

At-risk groups such as #olderpeople and those with #chronicdisease are at higher risk of morbidity, mortality and prolonged recovery due to underlying #frailty and changes in immune function. #Vaccines4Life [https://bit.ly/2m0cf4x](https://bit.ly/2m0cf4x) @IntFedAgeing @Vaccines4Life
Evidence must be improved on the burden of influenza among older people and at-risk populations. #Vaccines4Life
https://bit.ly/2m0cf4x @IntFedAgeing @Vaccines4Life

While logistical hurdles remain challenging, Canadian provinces and territories must determine effective methods of using existing data on vaccination to better understand where efforts are needed #Vaccines4Life
