

## **HEALTHCARE FACILITY DESIGN AND CONSTRUCTION INTEREST GROUP**

Chair: Daphne Murray RN CIC

Co-Chair: Barb Shea MLT ART CIC

### **Mandate/Goal of Committee**

To facilitate meeting the unique infection control needs of members. In addition, to provide a network for sharing of current information, ideas, solutions to issues, and other identified resources. Other important goals are to assist in nominating/supporting candidates for positions on standing committees, and IPAC roles, including linkages to other interest groups.

### **Membership of Committee**

Currently we have 206 members of this group. There is diversification in membership, coming from different professional designations.

### **Activities**

The past year was a very busy year for our interest group. We met monthly which was quite labor intensive. We have not had any meetings this past fall, but the subcommittee finished a position statement and presented it to the Standards and Guidelines Committee. We hope to have two meetings this winter.

Daphne Murray will be stepping down as chair, at IPAC Canada's National Conference in Niagara Falls.
