Serving communities within Metro Vancouver and the Fraser Valley, Fraser Health is one of Canada’s largest and fastest growing health authorities. With over 1.8 million people living in our communities, we serve 1/3 of British Columbia’s entire population with 33,000 dedicated professionals in our 12 hospitals and other facilities that expand from Burnaby to Hope.

We currently have several exciting opportunities for **Infection Prevention and Control Specialists** (Registered Nurses) to join our rapidly growing team.

The **IPC Specialist** works at a clinical program systems level and interfaces with IPC Practitioners and stakeholders to lead related initiatives for policy and process development, education, construction, and other areas as determined. Assesses needs and promotes program improvement and culture change initiatives; holds responsibility for the integration and standardization of evidence-based systems and tools with the design of safe, effective, and efficient care delivery processes.

**Qualifications**

- Current practicing registration as a Registered Nurse with the British Columbia College of Nurses and Midwives (BCCNM)
- Three (3) years’ recent relevant clinical experience in an acute or community setting, including two (2) years’ relevant experience in a designated clinical area
- Completion of post graduate course work and/or certification applicable to the designated clinical area
