

Francophone Long-term Care Frontline Workers Consultation

Call for Participants

Francophone Frontline Workers Consultation Session for CSA Group Standard on Operation and Infection Prevention and Control of Long-Term Care Homes

Dear Stakeholders,

We are reaching out today with information regarding a unique opportunity to assist the Canadian Standards Association in the development of a new National Standard of Canada, *Operation and Infection Prevention and Control of Long-Term Care Homes (CSA Z8004)*. French-speaking frontline workers in long-term care are invited to join a 2 hour virtual consultation session on **August 30th, 2021 at 12pm** where they will have the opportunity to share lived experiences and offer feedback.

This francophone consultation, hosted by the CSA, Bruyère Continuing Care, Carleton University and the Ontario CLRI at Bruyère, will ensure that the perspective of French-speaking frontline workers is taken into consideration. The French session will complement the English frontline workers consultation held on July 30, 2021. [<Learn more>](#)”

Please contact LTCstandardconsultation@bruyere.org with any questions or expressions of interest to participate in this session and receive additional details.
