REGISTRATION NOW OPEN FOR FALL 2024 SESSION

SPACE IS LIMITED, SMALL CLASS SIZES TO FACILITATE TAILORED AND ENGAGED LEARNING

PI-100: Infection Prevention and Control

The Longest Running Extensive
IPAC Course in Canada!

This 90-hour, hybrid online learning experience offers an up-to-date, comprehensive and evidence-based course covering basic and intermediate Infection Prevention and Control principles. All of our faculty and Program Coordinator maintain their Certification in Infection Prevention and Control (CIC). Course materials are presented using a combination of video lectures, discussion boards, live interactive sessions, quizzes, group and individual work to help prepare students for a successful career in IPAC and for writing the CIC.

PI-200: Infection Prevention and Control Practicum

This 200-hour clinical placement within an IPAC Department in a hospital covers all main aspects of IPAC. Apply theoretical concepts from PI-100, improve your problem solving and decision-making skills and develop, implement and share a project during your placement.

Note: Students must have successfully completed either PI-100 or an equivalent IPAC Canada Endorsed course.
