

# Transforming Infection Prevention for Long-Term Care Facilities

At **HealthConnex**, we specialize in delivering innovative, affordable **Infection Prevention and Control (IPAC)** and **Quality Auditing** software solutions. Tailored to the needs of healthcare providers, our platforms help facilities of all sizes improve operational efficiency, track trends, and enhance infection control practices with ease.

---

## Why Choose HealthConnex?

### Cost-Effective Solutions

HealthConnex's comprehensive and affordable platform helps facilities, including senior living and small to medium-sized acute care hospitals save an average of **8-10 hours per month**. Allowing staff to focus on education and quality improvement initiatives and less on repetitive data entry.

- **Save Time:** Minimize manual data entry, enhance staff productivity, and dedicate more time to quality improvement and compliance efforts.
- **Operational Efficiency:** Streamline workflows, reduce costs, and ensure data accuracy.
- **Improved Compliance:** Stay on top of regulatory requirements with real-time monitoring and robust reporting tools.

### User Friendly

Designed with clinicians in mind, HealthConnex is intuitive and easy to navigate, ensuring that staff can focus on care rather than technology.

- **Boost Staff Efficiency:** Simplify infection control and auditing processes with an easy-to-use platform designed specifically for healthcare professionals.
- **Comprehensive Support:** Access live training, guides, on-demand videos, and responsive support ensuring user confidence using HealthConnex.
- **Feedback:** We actively seek and incorporate user feedback to enhance the platform's functionality and ease of use.

## Industry Leading IPAC Management Platform

Our IPAC Management Platform simplifies infection prevention efforts for senior living communities and small to medium-sized hospitals. It helps manage outbreaks, track employee and resident health, and ensure regulatory compliance.

### Key Features:

- **Comprehensive Surveillance & Outbreak Management:** Monitor infections among residents, patients, and staff with customizable surveillance definitions, including IPAC Canada criteria for Long-Term Care.
  - **Visual Floor Maps:** Visualize infection data in real-time, improving communication during staff huddles and shift changes.
  - **Antimicrobial Stewardship:** Track antimicrobial usage, time-outs, and medication usage, helping facilities implement best practices in antimicrobial stewardship.
  - **Powerful Analytics:** Access detailed insights into infection rates, medication usage, immunization tracking and more.
  - **Data Integrations:** Seamlessly integrates with Electronic Health Record (EHR) systems for smooth data synchronization across your facility.
- 

## MyAudits - A Revolutionary Auditing Solution

MyAudits simplifies and digitizes the auditing process, replacing paper-based audits with real-time electronic data entry and detailed reporting. It can be used for audits of hand hygiene, PPE compliance, and various other quality programs.

### Key Features:

- **Any Audit, Any Time:** Conduct audits for Infection Control, Dietary, Environmental Services, Health & Safety, and more within a single platform.
  - **Built-In Reporting:** Quickly assess audit compliance with automated data reporting and analytics.
  - **Corrective Actions:** Easily document and track corrective actions to drive continuous improvement.
-
