RN, BScN, MHS, CIC, FAPIC,
CVAA(c)

CVAA and IPAC are pleased to present a joint educational webinar to address issues and opportunities in vascular access and infection prevention and control.

IPAC in IV Therapy - Back to Basics

Tuesday December 12, 2023
1:00pm ET

Zoom Log-in will be sent to registrants the day before the webinar.

Intravascular infections pose huge risks to patients in all settings. Although ICPs and Vascular Access Nurses have different roles and specialty knowledge, we share the need to prioritize prevention of these infections. This webinar will be a review of basic IPAC principles as they relate to intravascular therapy.

The Certification Board of Infection Prevention and Control approves 1 IPU for this education opportunity. All attendees will be provided with a Certificate of Completion.
